

# GRAND TRUNK

TRAVELLERS

## Biography

**Grand Trunk Travellers, fronted by Karl-Johan Jonsson, offers evocative vintage singer/songwriter-rock. They have traveled around in Scandinavia and the Baltic states with their grand harmonium-organ, glockenspiel, acoustic guitars and a bunch of other instruments. The band has 2 sold-out EPs, and their own premium coffee brand.**

The band has performed on everything from foreigner festival stages to local cafes, from private weddings to tv-shows, from someone's living-room to a staircase in Riga.

The ability to perform as full band with drums, electric guitars, and bass, or all acoustic sets with acoustic guitar, floor tom and special instruments as harmonium and glockenspiel, or a full live experience with all combined, and still sound like the same band, is probably one of the things that make Grand Trunk Travellers unique.

Karl-Johan writes songs that easily get stuck in people's heads for a long time. His trademark is singing thoughtful lyrics with feeling and warmth.

Musically, the band's sound has been described as a blend of vintage rock, singer/songwriter and... magical!

In 2015, the band also launched their own premium coffee blend, in cooperation with **Alingsås Kafferosteri**, available at concerts and at [jonomedia.se/shop](http://jonomedia.se/shop).

Grand Trunk Travellers are currently in the writing and recording process. Meanwhile, they are performing as much as possible.

**Management, press & booking:**
